A: This is completely illegible without the original document. I will assume the last one says 25. See ISO 5103:2001 8.3.3.3 maximum length of characters in any given line. A newline is only a minimum of 4 bytes. Counting characters in the PDF to get a column width is completely pointless. These are not what the PDF standard defines and the final PDF viewer adds its own style settings for everything like the column width (mine was set to 1.5). So make sure to check the final result.
